

Bending machine 1-0

Maximum capacity

Through-hardened steel

Height: 32 mm

Thickness: 2.5 mm

Edge hardened steel

Height: 50 mm

Thickness: 3 mm

Bending machine 1-0

Bender 1-0 meets the demands of the market for economical bending of die steel.

The rugged construction and all hardened guides permit the bending of 32 x 2,5 mm in through-hardened steel and 50 x 3 mm in edge hardened steel.

The large bending surface, 840 x 615 mm, assures good support when bending big dies.

Three sets bending tools, 19 x 14, 32 x 16 and 50 x 24 mm for bending of die steel in heights 19-50 mm are included the delivery.

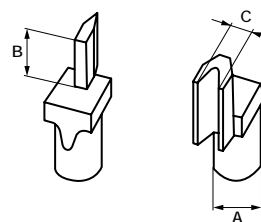

Dimensions

Size 840x615x185 mm

Weight 68 kg

Bending tools

A	B	C	Order No.
