

## Code marking device 5-0

Including: One revolving head, Pin tools (basic nicks)

## Code marking device 5-0

Equipment for marking dies. Turret with instant adjustment for round, V-shaped and square marks. The forming rolls are pressed into the cutting edge of the die steel by depressing the pedal.

The pillar tools are suitable for confined areas and only impact a basic form, which must then be formed using hand tools.

The device should be mounted on a work bench with a height of 850-950 mm.

Included in the delivery:

One revolving head, 2 sets pin tools (basic nicks) and one set hand tools.
